

Villa 2.0

44oz

Style:	Cut Pile
Pile Content:	Solution Dyed Nylon (SDN)
Width:	3.66m Broadloom
Pile Thickness:	13 mm (+/-5%)
Grading:	Residential Extra Heavy Duty and Stairs

Installation: For best finish results and maintaining the integrity of the warranty, it is recommended that carpets are installed in accordance with AS/NZS 2455.1:2007 unless otherwise specified. Regular cleaning and maintenance should be observed in accordance with AS/NZS 3733:2018.

Colour Variation: Colour may vary from dye lot to dye lot.

Material Variation: Backing or other materials may change without notice depending on raw material availability.

Pile Reversal: Cut pile carpets can have a stunning appearance but on occasion can develop pile reversal where areas of the carpet appear to become lighter or darker than the surrounding area, depending on the angles from which they are viewed. The cause of this phenomenon is not understood and cannot be predicted or prevented. Pile reversal does not affect the wear or durability of the carpet and is beyond the control of the manufacturer or installer and is therefore not considered a defect or manufacturing fault, but an inherent fibre characteristic.
