Discover our passion for...

nature

Most of our floors are PEFC certified, which endorses our use of sustainably managed forests.

natural knots

Some of our floors have knots that are only partially filled, others have knots that are sanded by hand. All this is done to emphasize the natural beauty of the wood.

design

We aim for the perfect balance between the type of wood, grading, colour, structure, finishing and plank size.

authenticity

By using different treatment techniques such as fuming and special staining, each plank has a unique colour. Thanks to these treatments, we create a lively colour variation between the planks. These effects bring the authentic character of nature into your home.

artisan characteristics

Saw cuts are tangible evidence of pure craftsmanship. The manually applied saw cuts vary both in depth, width and frequency. Not a single plank is identical!

craftsmanship

A Variano plank consists of multiple small boards and is composed by hand, with an eye for detail.

details

Our reclaimed look of Quick-Step Variano shows saw cuts, height differences and small gaps.

perfect finishing

Some of our floors look as matte as untreated wood, and are also easy to maintain.

wooden textures

A brushed finish accentuates the natural grain of the wood and creates an extra authentic feel.

Authentic beauty meets easy living

Maximum pleasure, easy maintenance

All Quick-Step timber floors are finished with an advanced lacquer to give your floor added resistance to wear, marks and scratches. The new water-repellent Protect+ technology also helps to prevent water from penetrating between joints of your floor as this often makes joints look tired or stained. This helps to keep the joints between the planks looking as good as new. Thanks to the unique combination of this new technology and our authentic floor designs, you will be able to enjoy your floor's beauty for years to come.

NEW Protect+

With Quick-Step's unique Protect+ technology, your floor will look better for longer. Find out more on p. 8-9.

Quick-Step Timber, the beauty of nature

Welcome the beauty of nature into your home by choosing a 100% real timber floor from Quick-Step. With a wide choice of different plank sizes and natural colors, you will find the perfect floor for your style and interior. We pay extra attention to the knots, grain and colour of the planks so you get to enjoy the warmth of a handcrafted wooden floor.

A perfectly installed floor is just a few clicks away

A timber floor that's easy to install? Quick-Step makes it possible. Whether you decide to do it yourself or have it done by a professional, your new floor can be installed in no time, thanks to the Uniclic® Multifit system. This click system enables you to click the planks together, using three different methods. Visit www.quick-step.co.nz for more information.

Another great advantage of Quick-Step timber floors: there's no need for post-installation work in order to start living on your floor. No sanding, no dust, no varnishing, oiling or painting. As soon as your Quick-Step Timber floor is installed, it's yours to enjoy for years to come.

How to install your timber floor

Installing a Quick-Step Timber floor is very easy. Let us help you out with our installation videos at bit.ly/ytquickstep

Authentic beauty that lasts a lifetime

If you're opting for a wooden floor, you'll want to retain its authentic beauty for as long as you can. Timber floors from Quick-Step have been designed with exactly this in mind!

High-quality lacquer finish

Sliding chairs, high heels, kids... Floors go through a lot. That's why Quick-Step timber floors have an additional, high-quality protective layer of lacquer. Whether you opt for the light glossy or typical matte look of untreated wood, your floor will be better protected against wear and tear, marks and scratches.

NEW Unique, water-repellent bevel technology Protect+

Spilled something? No need to panic! Maintaining your timber floor has never been so easy. Quick-Step Timber floors feature a unique, water-repellent technology in the form of Protect+. There's no need to worry if you spill something or while cleaning, as Protect+ stops fluids from penetrating and staining the edges of planks, keeping the joints between the planks clean and looking fresh for years to come.

Looking for a floor that is easy to maintain? A Quick-Step Timber floor is just what you're looking for.

WITH PROTECT+ TECHNOLOGY

WITHOUT PROTECT+ TECHNOLOGY

Create your own living space

A beautiful interior starts with a good foundation. Whatever your style, whatever your room, Quick-Step has the right floor: from light, sleek floors to warm brown classics and even reclaimed floors with knots and cracks.

ROOM

Product build-up

- High quality lacquer finish
- Solid hardwood face layer
- Plantation hardwood Hevea core (Compact range: HDF)
- Plantation Nordic spruce backing

Please note: Many 1 strip products feature shorter boards. At Quick-Step, we know that when you want a stunning 1 strip floor, you don't want it full of short boards, that's why we minimise our short boards ratio lower than almost every other brand to give you the look you deserve. Our balance of short boards adds authenticity to your floors. This costs a little more, but looks so much better. Another great reason to buy a Quick-Step floor.

* up to 4 shorter boards per pack

** up to 6 shorter boards per pack

All timber ranges are PEFC certified,

The detail makes the difference

Quick-Step's Timber collection is made with real oak, and each floor has its own unique look and feel. By combining the careful selection of grading and structure with innovative coatings and finishes, we ensure that all elements of our floors are in perfect harmony. Whatever you're looking for, we have the right floor for every style and every room.

Grading

All Australian wood varieties are graded as per AS2796 Standard and better. This grade includes knots, gum veins, fine cracks, and other natural features of Australian Eucalyptus. For oak we have a unique grading system that sorts our floors into three different categories. It gives you an idea of how your floor will look. Quick-Step Oak flooring is available in 1 of 3 grades:

Nature

Wood with small knots. Light variation in colour and structure.

Marquant

Wood with large knots. Lively variation in colour and structure.

Vibrant

Wood with large knots and small cracks. Lively variation in colour and structure with a rustic appearance.

Masters of our craft

At Quick-Step, we're passionate about the beauty of wood. That's why we only use the finest wood for our timber floors. We work with traditional, high-quality materials and handle them with the greatest care and attention, yet we never cease to innovate when it comes to interior design. Learn more about our passion on page 4 - 5.

Types of wood

Oak

Oak is the most popular hardwood flooring product in the world. It ranges in colour from pale straw to mid brown and offers distinctive and desirable grain patterns.

Blackbutt

Blackbutt is an Australian hardwood with excellent hardness. It may contain prominent gum veins, insect marks as well as some fine surface cracks. Not recommended with heated subfloors.

Spotted Gum

Spotted Gum is an Australian hardwood with wide colour variation and excellent hardness. It may contain some fine surface cracks. This wood species is not recommended with heated subfloors.

*Hardness Janka rating

The rating is a measure of the resistance of the wood to indentation. The higher the number, the more indentation resistant the timber.

Treatment

 Brushed  Deep Brushed

Brushing accentuates the natural grain structure of the wood plank and adds depth.

 Saw cuts

Random saw marks show the craftsmanship and character of the wood planks.

 Timeworn

Sloping, slightly worn edges create an aged look.

 Natural knots

On some floors the knots are not fully filled. Some of them are even manually sanded to emphasize the liveliness of the wood.

 Reclaimed look

Our Variano floors are designed with a reclaimed look: showing saw cuts, height differences and small gaps. See p. 23.

 Design colours

By using different treatment techniques such as fuming and staining, each plank has a unique colour.

Finishing

All Quick-Step Timber floors are prefinished in the factory, which means no oiling or lacquering is needed after installation.

1 Oiled

 Oiled finish

 Extra Matt Oiled finish

- 2 layers of high quality oil.
- Brings out the authenticity of real wood.
- Can be renewed and repaired with Quick-Step maintenance products.

 Extra Matt Oiled Finish **NEW**

The new extra matt oil finish highlights the nude and authentic character of the wooden floors.

2 Lacquered

 Extra matt finish

 Matt finish

 Silk finish

- 7 layers of protective lacquer.
- Highly scratch and wear resistant. Protects against water and household chemicals.
- Easy to clean wooden floor.

 Extra matt finish **NEW**

The extra matt lacquer finish combines the look of an untreated floor with the advantages of a lacquered floor.

STEP 1 INSTALLATION

Install your floor without a hassle!

Laying a Quick-Step floor is so easy thanks to the patented world-famous Uniclic® Multifit click system. This system is highly user-friendly, quicker to install and a lot more solid than other systems. A Quick-Step floor makes installation easy, even in the tightest corners or under doors.

1 Effortless installation, thanks to the Uniclic® Multifit click system

Quick-Step is the inventor of the Uniclic® Multifit installation system, today the standard click-to-install system. Use this revolutionary and patented click system to effortlessly click your floor planks together.

2 Install your floor anywhere, even on floor heating

Quick-Step Timber floors are perfect for installing over floor heating when combined with the right underlay. Some species are not suitable, see page 18.

3 Watch the videos

See for yourself how easy it is to install a Quick-Step floor in our installation videos. Discover them on www.quick-step.co.nz.

Installation tools

Install your timber floor in an easy and professional way with the handy Quick-Step installation tools.

Quick-Step® HANDSAW

Handy handsaw used to undercut door frames.

Quick-Step® INSTALLATION KIT

Includes a special Uniclic® tapping block, pulling tool and spacing wedges.

For a perfect installation, check out the installation videos on www.quick-step.co.nz

Underlay is not an idle luxury

CLICK on timber

Installing your timber floor is easy thanks to the patented Uniclic® Multifit click system. A good underlay has a major impact on the final look, walk sound, quality and comfort of your Quick-Step Timber floor.

- Maintain their initial thickness over the years and provide excellent acoustic insulation, keeping your floor quieter underfoot.
- Levels and helps to prevent small irregularities.
- Comes with a self-adhesive strip and a pre-integrated damp proof membrane (DPM) which protects your floor from rising damp, with a water vapour resistance of greater than $SD > 75m$, meeting all European recommendations.
- Suitable for floor heating and/or cooling.
- Offers a stable base which supports your floor in instances of dropped items or temporary heavy loads.

Quick-Step® COMBI-LAY STANDARD

Contents:
1 roll = 20 or 50 m²
Thickness: 2 mm

Combi-Lay Standard is no normal underlay. The dense, closed cell polyolefin foam provides excellent support, with good reduction of both reflected and impact noise.

Quick-Step® QUIET-STEP COMBI-LAY

Contents:
1 roll = 20 or 50 m²
Thickness: 2 mm

Quiet-Step Combi-Lay is the first choice where a quiet walking sound and maximum reduction in multi-storey noise is required. This high density underlay has no match when it comes to reducing foot fall noise, with a reduction of up to 30% over standard underlays. Ideal for installation in multi-storey apartments where noise transfer can be an issue.

For the best results always start with a level subfloor. Make sure it's completely dry as well. **For more advice about preparing your subfloor, visit www.quick-step.co.nz or your local Quick-Step retailer.**

GLUE

Quick-Step Timber can also be glued down using Quick-Step Parquet Adhesive.

- Spreads easily and guarantees great adhesion.
- Suitable for floor heating and/or cooling.

Please note: Contact your Quick-Step retailer for more details on gluing a Quick-Step Timber floor.

STEP 2 FINISHING

Finish beautifully

Finish your floor beautifully with the Quick-Step scotia and profiles.

Finishing profiles for floor and stairs

Quick-Step's Incizo® profile is a multifunctional finishing tool. The same profile can be used for all the finishes of your floor and stairs, in the matching colour. Simply cut the Incizo® basic profile to the shape required using the special cutter supplied in every Incizo pack.

Quick-Step® Incizo®: five questions, one answer

1 How can I join two floors of the same height?

Use the Incizo® profile cut as an expansion profile.

2 How can I solve variations in height from one floor to another?

Use the Incizo® profile cut as an adapter profile.

3 How do I finish my floor along a wall or a window?

Use the Incizo® profile cut as an end profile.

4 How can I connect my floor to a carpet, and have a beautiful finish?

Use the Incizo® profile cut as a transition profile.

COM3845

For safety reasons, always glue the floor panels on the stairs of your staircase.

5 What about the finishing of my stairs?

You can cover your stairs or steps with Quick-Step planks and finish in the style of your choice using the Incizo® profile as a stair nose. Remember to order the Incizo aluminium sub-profile for stair installations.

Quick-Step® INCIZO® PROFILE

QSWINCP(-)

215 cm x 5.4 cm x 1.7 cm

Contents: 1 Incizo®, 1 cutter, 1 plastic rail, screws and plugs

Quick-Step® INCIZO® ALUMINIUM SUB-PROFILE FOR STAIRS

NEWINCPBASE(-)

Scotia

QSFWSCOT(-)

Quick-Step® SCOTIA

240 x 1.7 x 1.7cm

The veneer timber scotia is perfect for covering expansion gaps along skirting boards.

STEP 3 CLEANING

Keep your floor in top condition

Clean

Quick-Step® CLEANING KIT QSCLEANINGKIT

Contents: mop holder, washable microfibre mop, Quick-Step Cleaning product 750ml

All Quick-Step cleaning products are specifically developed for Quick-Step floors. They cleanse the floor surface thoroughly and maintain the original look of your floor. No residual layers of cleaning product are left behind. Naturally, wood flooring will mark and scratch when items are dragged across or dropped onto the surface. However proper maintenance will keep your floor looking better for longer.

Also available separately:
Quick-Step®
CLEANING PRODUCT
QSCLEANING750

Repair

Quick-Step® REPAIR KIT QSREPAIR

Contents: melting knife, cleaning comb, 7 wax blocks, sanding pad

Light damages can easily be repaired in the original colour with the Repair Kit. Simply recreate the colour of your damaged planks with one of the seven wax pieces selected to cover all Quick-Step colours. Check the specific colour combination for your floor on www.quick-step.co.nz

Watch our repair movie showcasing how to repair your timber floor.

Tips to keep your floor in top condition: Placing dirt trapping mats at external entrances and felt floor protectors under all furniture is recommended. Where possible, use rubberised castors and wheels designed for hard flooring and vinyl chair mats under castor wheels and office chairs. Remove small stones and grit with a soft bristle broom or vacuum to help prevent scratching. Quick-Step Timber should also be protected from excessive heat and sunlight. The use of steam mops and stiletto heels should also be avoided at all times. For regular maintenance, use the Quick-Step Timber Cleaning Kit for best results. (For full maintenance guidelines go to www.quick-step.co.nz)

Oiled Timber floors: the cleaning cycle

EVERY 4TH CLEANING

Quick-Step®
OIL CARE
QSCARE750
Contents: 750 ml

Keep your floor in top condition

- Protects your oiled timber floor and prevents it from drying out and losing its gloss
- Restores the original look and eliminates micro-scratches
- Delays the need for maintenance oil
- Easy, user-friendly and efficient
- Use once every 4 "slightly damp" cleans

EVERY YEAR

Quick-Step®
MAINTENANCE OIL WHITE
QSWMAINTOILW

Quick-Step®
**MAINTENANCE OIL
TRANSPARENT**
QSWMAINTOILN
Contents: 1 L (=75 m²)

For intensive care & repair

- Retains the oiled timber floor's matte finish
- Repairs minor damages to the floor
- Nourishes the floor
- Low emissions
- Solvent-free

There is no substitute for quality

When looking at any pre-finished timber floor it is important to pay serious attention to the wear resistance of the coatings used. After all, it is the coating that will afford protection to the timber surface of your floor and the better the quality of the finish used, the longer your floor will look its very best.

Wear resistance, or abrasion resistance, is tested using a taber abrasion machine that simulates day to day wear of the coating system. Taber testing is universally recognised as the best testing method to evaluate the wear performance of a floor covering. In essence, the better the abrasion resistance, the longer your floor will hold its initial gloss level and the longer the coating will last before wearing through to raw timber.

Most competitors use a standard "off the shelf" finish that wears reasonably well, but that's simply not good enough for the designers at Quick-Step.

SRT Finish is a specifically formulated, high performance lacquer that has been developed in Europe and used on all lacquered Quick-Step Timber floors. Laboratory tests clearly demonstrate that Quick-Step's SRT Finish outperforms the competitors, ensuring that when you choose a Quick-Step floor, you are selecting a timber floor with only the best available pre-finished coatings available. What's more, SRT is able to be re-coated using a wide selection of local finishes, meaning trouble free maintenance when it comes time to replenish the coated surface of your floor in years to come.

A heart for nature

Wood is one of very few renewable source material for floor coverings and for many years Quick-Step has gone the extra mile to limit the environmental impact of its activities. All the wood used to manufacture our engineered wooden floors is sourced from sustainably managed forests. Moreover, our glue and lacquer meet the strictest international emission norms and we only work with efficient and durable production processes. All of this means you can simply enjoy your wooden floor knowing it was made with respect for the environment and your family's health.

- ☑ More than 75% recycled, sustainable wood
- ☑ We use carefully screened raw materials
- ☑ We invest in energy-efficient production

Matching Accessories Guide

Flawlessly matching accessories are available in all Quick-Step timber products. Quick-Step is committed to perfecting all aspects of flooring by meticulously colour-matching trims and profiles for all applications including stairs across all timber ranges.
