Karndean LooseLay Longboard

Karndean LooseLay Longboard is a collection of 12 woods featuring unique designs in a 1.5m long format.

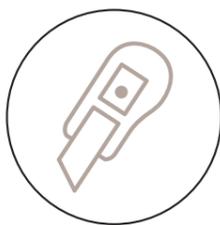

Its textured finish, industry-leading friction grip backing and authentic replication of natural wood products make Karndean LooseLay Longboard a practical and attractive flooring option for any interior.

Making the most of the 1.5m length, each design displays intricate details found in the original woods that inspired the collection. Native Australian species feature heavily in this range with Tasmanian Oak, Blackbutt and Spotted Gum all represented. Oaks from Europe and Heart Pine from the USA complete the offer to present a contemporary palette in a loose lay format.

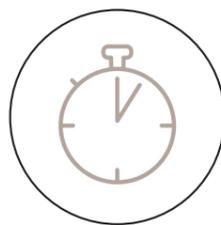

With the added benefits of...

Extra large planks

Individually replaceable

Quick and easy to install

Acoustic qualities

1500mm x 250mm

PU Protective Layer

Our enhanced surface treatment provides added protection and reduced maintenance.

Clear PVC Embossed Wear Layer

Protects the floor's design from wear and tear.

High Definition Photographic Layer

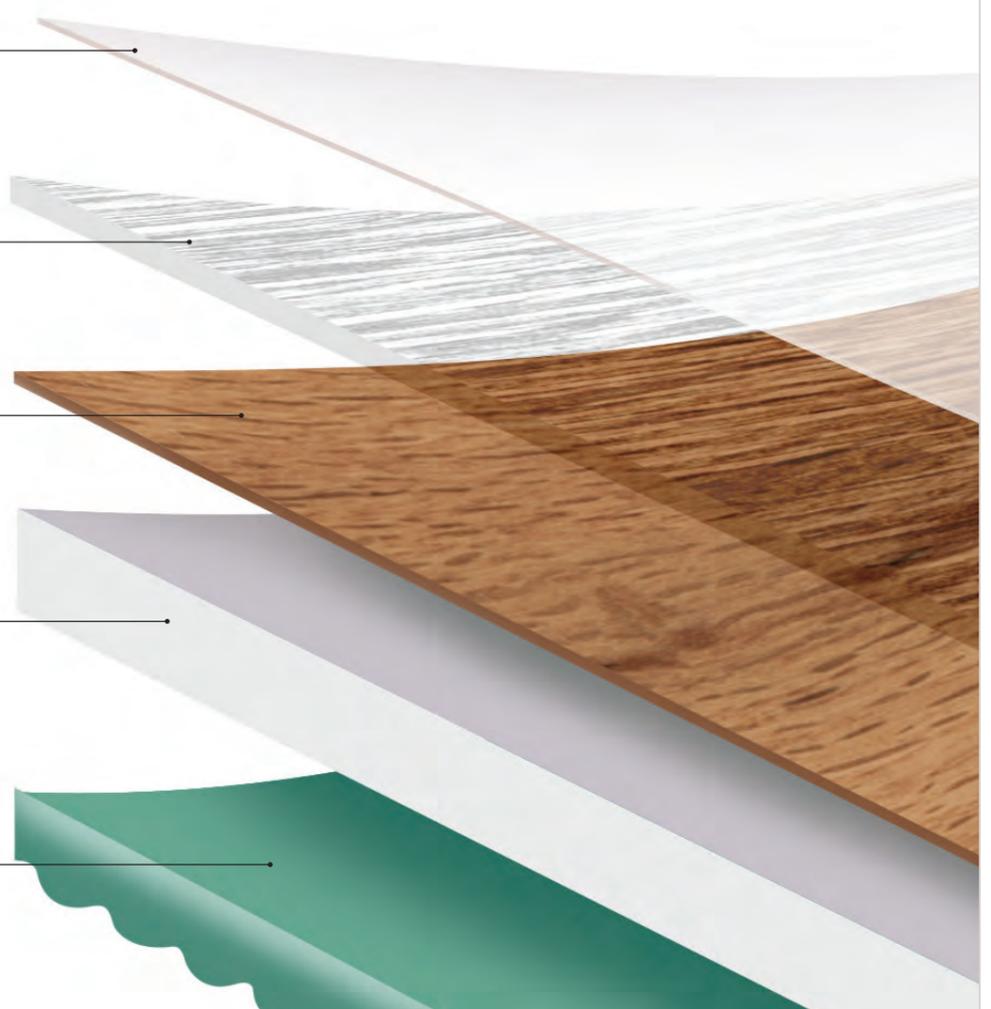

Gives every Karndean product its highly realistic and natural appearance.

Stability Layers

The fibreglass enhanced layer helps the product to lay flat and level, increasing dimensional stability and mechanical strength.

Grip Backing

The backing creates a strong bond to the subfloor using a combination of weight and friction.

A firm favourite in houses and apartments throughout the land, Tasmanian Oak is actually eucalyptus wood, not a true oak at all.

The Blackbutt takes its name from the lower half of the trunk which is often blackened by the forest fires that both destroy, and renew, our environment.

Twilight Oak LLP301

A modern dining room featuring a large window with a black frame, a wooden floor, and a dining table with black chairs. The room is bright and airy, with a view of a lush green landscape. A text box is overlaid on the right side of the image, providing information about Spotted Gum trees. The floor is made of wide, light-colored wooden planks with a natural grain pattern. The dining table is round and white, surrounded by black chairs with woven seats. A window seat with patterned cushions and a wooden barrel is visible in front of the window. A painting of a boat is on the wall to the left.

Spotted Gum trees can grow up to 45 metres in height. The bark of this tree sheds in patches and this is what creates the spotted appearance that makes this species so distinctive.

Oak has long been popular in Europe. The original inspiration for this particular group of products came from oak that was sourced from the beautiful Loire valley in France.

Champagne Oak LLP310

Heart Pine originates from the USA and is hundreds of years old. Over the years, the cut planks, with their wide open grain, develop a unique weathered and used look.

Colour and Pattern Reproduction

We are careful to make sure our brochures are accurate and printed to very high standards, but photography and printing cannot always create a perfect representation of our products. For this reason we strongly recommend that you look at a sample of any product you are considering before placing your order.

All of our products are inspired by things we have seen in the natural world. Just as variation in colour and detail is part of the unique beauty of natural materials, it is also a feature of many of our designs. This means that with some of our products you will see natural variation when your floor is laid. If in doubt, ask your retailer to show you a larger sample of the product.

We love developing new ideas and improving on our existing designs. This does mean that sometimes products are withdrawn at short notice. We hate to disappoint, and will always try to work with you to find an alternative design that you love just as much.
